## 1. A company that wants to be Gulf SQAS assessed:

### 1.1. Question: How can a company be Gulf SQAS assessed?

#### Answer:

- Any logistic service provider (on its own initiative or on the request of a chemical company) may decide to have a Gulf SQAS assessment performed.
- The company to be assessed selects a certification body from the list of Certification Bodies. The certification body will assign an accredited Gulf SQAS Assessor. The assessors' location of work is defined on the Gulf SQAS website.
- The company to be assessed downloads a blank **Pre-Assessment Document (PAD)** from the Gulf SQAS website.
- The company to be assessed fills in the PAD with all the applicable information necessary for the assessor to identify the scope of the assessment.
- The filled in PAD has to be sent to the assessor by the company to be assessed
- The accredited assessor enters a planned assessment pre-notification in the system at latest three weeks before the start of the assessment. This pre-notification contains the contact name and e-mail of the assessed company. GPCA may verify the pre-notification is in conformity with the Gulf SQAS process.
- The agreement is sent to the company contact for electronic approval and signature by the authorized manager from the company to be assessed (or his representative), who acknowledges and electronically signs the agreement to authorise the inclusion of the assessment report in the electronic Gulf SQAS database.
- The assessor carries out the assessment
